

**TTII**

**TTII Motor Insurance Loss Adjusting and Investigation Course.**

TTII is proud to reintroduce its updated MICIA - Motor Insurance Loss Adjusting and Investigation Course to the 2015 class schedule lineup. This programme which has been under review for sometime is newly restructured to have content that is current and pertinent, while placing more emphasis on practicum. Motor Loss Adjusting has always been a fascinating aspect of the underwriting and claims functions with roots in forensic review, scene mapping and investigation (*think CSI*). By forming strategic alliances with industry stakeholders, we have strategically complimented these syllabi elements with hands-on visits to automotive garages and experienced, engaging lecturers. In our continuous efforts to outfit the insurance industry with higher qualified and competent professionals, we are happy to add these fresh and exciting components to the programme which is offered at certificate and diploma levels.

Commencement date and details of course: T.B.A
